Instructions

Be careful with your fingers while operating the unit.

TO USE THE UNIT AT ITS GROUND LEVEL

1. Squeeze the two knobs and lift up from the back.
2. To adjust to desire angle, place the metal bracket into the slot.
   - Squeeze both knobs inwards
   - Release the knobs once the panel is lifted up.
   - 3 levels of angle can be adjusted

TO USE THE UNIT ELEVATED

1. Unfold the panel from the front & place the metal bracket to the stopper bar at the backside of the panel.
2. Holding on both knobs & lift up the panel.
   - Do not release the knobs until the height is fixed.
3. Insert the support bracket to the pair of holes on each side to reach desired height.
   - After inserting the support bracket, release the knobs.
   - There are 4 pairs of holes for height adjustment.
